

## Synopsis

This course looks at the threats and risks law firms face with the data and information they hold and how to defend against security breaches.

It walks learners through the main risks they are likely to face at work, with interactive activities that will help them spot the common signs of threats such as phishing. There is also a survey which allows learners to reflect on their current information security practices, and which offers tailored feedback.

All staff

20 minutes

## Outcomes

As a result of this course, you will be able to:

- identify the main risks facing law firm information and data
- recognise some of the 'red flags' to look out for
- reflect on your current information security practices and how to improve on them
